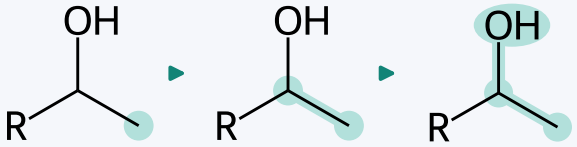
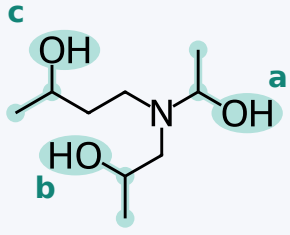
a MAPPA matching: grow, complete and branch

A, B and C are successive local alcohol fragments; R lies outside the matched motif.

Grow on base; keep one witness



Target: three distinct sites



At saturation

Complete A

Complete B

A remains fixed

Complete C

A and B remain fixed

- A → a
  - B → b → C → c
  - B → c → C → b
- A → b
  - B → a → C → c
  - B → c → C → a
- A → c
  - B → a → C → b
  - B → b → C → a

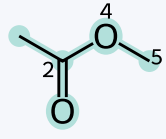
C-C, C-O and every attached H are checked.

Three placements → two unused sites → one remaining site

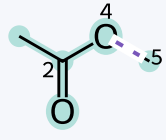
b Explore cuts; collect the retained families

Methyl acetate: three base conditions are shown.

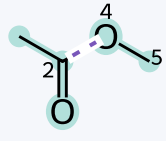
Uncut



Cut O4-C5



Cut C2-O4



Family catalogue

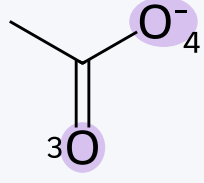
Across seeds and cuts

Merge repeated families; retain their constraints.

c Decode shared fragments and boundaries

Use original bond weights and the saved joint choices.

Unique fragment



Allowed O exchange: 3 ↔ 4

One compressed family shared local responses
